Short Description of our Summer Program

Week One 06/21 - 06/25 Survival Week

First week of summer camp will be focusing on how to survive or what to do in a situation if we get lost. What I will do if I get lost in the store? or what should I do if I cannot find something? We will be teaching our students how to use their survival skills and be calm to any situation. The most important thing of this week is to develop critical thinking and survival skills. Therefore, kids will be better prepared for the upcoming topics and the future projects challenges.

Week Two 06/28 - 07/02 Garden Week

During this week students will learn how to plant seeds and how to take care of their own plant, flower, or vegetable. Students will learn to be patient and they will see how day by day their own seeds will grow.

Week Three 07/05 - 07/09 Adventures Week

For this week we will introduce different kind of activities for our students, the activities are fun interactive and educational at the same time. Students will learn how to work in teams and support each other in a task. Games as outdoor twister, parachute, maze, and many more fun games.

Week Four 07/12 - 07/16 Rainforest Week

A journey through the wilds of a tropical rainforest. This week students will learn that the rainforest are lush warm wet habitats and trees can grow very tall because they must compete with other plants for sunlight. They will learn that rainforests are structures in four layers: emergent, canopy, understory, and forest floor. We will do projects to learn each layer.

Week Five 07/19 - 07/23 Camping Week

For this week students will learn the essentials for camping.

Week Six 07/26 - 07/30 Environmental Week

During the environment week students will learn the impact of different factors on our nature their cases and the main effects for example the influence of the greenhouse effect on our planet. Projects related to rain on plants and the power of the air on our planet will be practiced. Environmental week is primarily focus on science projects.

Week Seven 08/02 - 08/06 Space Week

This week will be mostly about space solar system and real- life experience. Space week will be about stars and said satellites from the previous projects' students will know about conditions and need for the life on the planet and will learn about atmosphere on other planets. Also, we will learn the moon phases and how this affects people's lives. They will have a chance to learn to be creative and how to make their own Galaxy or space shuttle. Math skills will be learned to calculate and learn about the earth and the solar system. Students find we will find out how does glacier movements affect earth and how earth's wobble affects the rotation of earth.

Week Eight 08/9 - 08/13 Ocean Week

During this week children will cover topics related to ocean ecosystem an underwater life. Ocean week is also about the water level on earth. Children will have a chance to experiment with ice melting and other related topics for example gelatin effect on the ice melting. Ocean week will introduce basics of the biology and related subjects.

Week Nine 08/16 - 08/20 Africa Week

Students will learn all about African animals, the fun of making different animals masks, and the kind of habitat animals have in Africa, we will learn the origins of Africa and its traditions.

Week Ten 08/23 - 08/27 Jurassic Park Week

This week students will learn all about dinosaurs' bones, they will pretend to be a paleontologist and find bones or special rocks using their imagination.

Week Eleven 08/30 - 09/04 Scavenger Week

Scavenger hunts are an easy, adaptable, and fun way to interact with their peeps, and help them start making discoveries of their own. Not only can scavenger hunts be done just about anywhere, but they also boost observation skills and help children develop early learning skills in a fun, relaxed and natural way.
